

1

No Crosswalk

2

Difficult Pedestrian Crossings

3

Very Narrow Sidewalk

4

Bus Stop Not Easily Accessible

Proposed Improvements

- Easing traffic flow for cars, bikes and pedestrians.
- Widening the sidewalk south of Tamarack, including across the bridge.
- Moving the bus stop out of the middle of the intersection so it's easier and safer to use, especially for people with disabilities.
- Designating more space to sit and enjoy the view.
- Creating additional free on-street parking.
- Enhancing the natural beauty of the area, including drought tolerant plants.

Road Options

As part of these improvements, the city has developed three concepts for the intersection:

- A two lane road with a roundabout
- A three lane road with a traffic signal
- A four lane road with a traffic signal
